Course Introduction

Regulatory Framework of Business is assigned 5 credits and contains 15 units. A legal and regulatory framework may be viewed as a set of constitutional, legislative, regulatory, jurisprudential and managerial rules that together establish the voting rights citizens use to elect representatives. Beyond the selection of public officials, citizens often use elections to accept or reject legislative bills, governmental decisions and resolutions.

Each unit is divided into sections and sub-sections. Each unit begins with statement of objectives to indicate what we expect you to achieve through the unit.

Course Outcomes

After studying this course, a student will be able to –

1. Define the basic understanding of the Legal Environment of Business.
2. Demonstrate the legality and Statute of Frauds in contracts & mercantile laws.
3. Apply the various provisions of Sales of Goods Act, Consumer Protection Act and Partnership Act.
4. Differentiate the trust and accountability between stakeholders.
5. Assess the standard business and legal terminology.
6. Build up the skills for case study analysis.

We hope you will enjoy the course.

1.1 Concept of competition law

- The Concept related to Competition Law had been enacted in the year 2002. It could be said to be the reason behind the country pursuit towards liberalization along with globalization at the same time.
- The introduction of the act could be said to be key step towards India much anticipated competition towards the global market. It had been from the internal as well as the international market to be certain.
- The act does not prohibit in competition from the market instead the act seeks primarily towards regulating of practises that could be said to have adverse effect towards the competition prevalent in the market. The addition aspect includes in promoting as well as sustaining in competition in the market along with promoting of interest of the consumers, ensuring the fact that freedom is being secured in the field of trade and commerce (Bhattacharjea and Gouri, 2019).
- The Act also enforces in the fact that provides in form the establishment of the Competition Commission of India. It establishes in the function that tends to come up along with market regulator towards the preventing along with regulating in anti-competitiveness practises that could be noticed in the country along with the Competition Appellate Tribunal.
- It could be said to be quasi-judicial body that is being established in order to hear in the dispose of appeals along with against any direction that had been issued or decision that had been made in by the CCI.
- In India, The Competition Act, 2002 has been enacted in order to ensure in the fact to ensure in sustainability of the competition in the market along with considering in the interests of the consumers along with allowing towards participation of the Indian Market towards trade along with its freedom.
- The concept of Competition Market could be said to be inclusion of the enactment of the fact that includes in sustainability of competition in the market along with considering in the interest of the consumers. This law is said to be promoting in competition along with leaving in the market towards unbound by the manipulation of strong trade related practises.

1.1.1 Competition Advocacy

- The concept related to Competition Advocacy could be said to be important objective related to competition law. It could be said to be activities that include is providing and promoting in awareness about the advantages related to the competitive market. The Competition Commission of India has been vested with the power towards being obliged into take in the charge related to advocacy for the Competition Law for the welfare of the consumers welfare reforms can be said to be important priority.
- There had been efforts being taken by the State and the Central Government along with other sectors towards consisting of business enterprises along with consumer based activities also.
- The act lays emphasis towards the importance of the initiative that had been taken in by the concerned officials towards adjudication of the aforesaid acts. It includes the policy makers along with sectoral regulators along with public at large.
- It is law that provides the discretion towards the Central and the State Government towards making in reference towards the CCI for their important opinion related to diversified results. The important issues highlighting the stakeholders could be noticed by the application of the act.
- There are various advocacy tools that could be used towards developing in the market that includes in utilization of competition authorities. The seminars along with workshops could be said to be important tools towards targeting huge number of audience.

1.1.2 Principles of Competition laws:

- The concept of competition laws could be said to be inclusion of the rules that had been established with the aim towards protecting in the competition prevalent in the market for the services along with goods.
- The rules concern towards the act that includes in undertakings that had been engaged in economic based activities in the market that is the inclusion of goods along with services (Kathuria, 2018).
- The competition-based rules prohibit agreements along with the decisions and concentrated based practises that do restrict in competition between undertakings and also includes in dominance in by the senior officials. The mergers along with acquisitions are also being controlled in by them.

- The Articles 4,5 and 6 could be said to be foundation of the implementation related to the act along with services.
- The concept related to public undertaking seems to be absent in this accord.
- There is concern about agreements, practises, along with decisions that can be of various kinds of undertakings in or affecting towards the markets related to goods along with services that may distort or restrict in competition.
- There is also abuse of dominant power on the part of the undertakings that does hold dominant position in the market.
- There is also concern based on the legal transactions and behaviour that has to be with respect to mergers and acquisitions that aim towards creating in dominant position that does result towards decrease towards competition.

1.2 Definition of competition law

- The concept related to competition law could be said to be body of legislation that is being intended towards preventing in the market distortion that is being caused in by the anti competitive practises in the different parts related to business. The purpose behind the application of law had been towards ensuring in fair market place for the producers along with consumers by the prohibition of the unethical based practises.
- It had been designed in to have greater market share that could be accessed in by the honest means of competition. The non competitive practises includes in smaller companies that could be entering is succeeding in the market but also includes in higher consumer based prices, less of innovation along with poorer services.
- There are certain arrangements that could be said to be anti competitive and is to be assessed based on the nature related to objectives it includes in competition rather than just working. The concept related to gentleman agreement could be said to be equally capable of being found along with the formal or the written agreements.
- They could be said to be agreements that is being directly or indirectly being used in order to fix in purchase or selling price. They could be used with respect to trading conditions, discounts along with rebates (Mehta, 2018).
- There can be agreements that could be used with respect to control of production markets along with technical development, investment that includes in quotes or the level of output in the process.
- The agreements that is being used with respect to share markets or the sources of supply.

- They agreements that could be used with respect to application of dissimilar based conditions to similar transactions or trading parties.

1.2.1 Objectives related to Competition Law

- The concept of Competition law is said to be existing and is to ensure in the business operate in the competitive market. The law aims towards promoting in the healthy and fair competition among competitors. It is important that business needs to be aware of the main rules in order to avoid in the aspects that dies cover anti competitive practises. There can be serious repercussions along with penalties that could be imposed on towards the infringement makers.
- It is important to prevent in the practises that could be having in adverse effect towards competition, it also includes in competition in business or other related companies. It does includes in losing in profits along with potentially being out of business as they had not being in the operating mode for quite some time.
- It is also necessary to promote in sustain competition in the markets. If fair competition does not come up then society would not be availing in best of the services from the market.

1.2.2 Explanation as to the objectives.

- It is also important to protect in the interests of the consumers. They should pay in the fair price for the right kind of product.
- There has to be agreement that needs to be made in between the parties on the same side in the market that is to buy in or sell in the product or service in the market. It prevents in the businessman towards being able to compensate for the same. It also prevents in from the free competition in the market.
- There has to be agreement in the same market that includes in the limit production in order to lessen in the competition in the market.
- The competition market needs to be within the parameters that had been enlisted for the competition.
- It is important that business need to compete in a free mode and they cannot be imposed along with certain contract or the other without any form of competition.

4.1 Objectives and definitions

In the present market there are various markets that had been developed taking into account the control towards international trade along with the regulation of international indebtedness that could be arising in from the international dealings and functioning of the market. There has to be concept related to economic nationalism that could be said to be gaining interests towards the development of the economic interests. There is foreign exchange control that could be said to be important control device developed for the purpose.

The concept related to foreign exchange control could be said to be system wherein government of the country is to intervene along with not only maintaining in the exchange rate likewise is invested towards maintaining in minimum rate of exchange. It is necessary on the part of the home buyers along with the sellers of foreign currencies to dispose in the foreign based funds in the most comprehensive mode and manner.

The concept related to Foreign Exchange Control could be said to be method that includes in state intervention in the exports along with imports for the fact that adverse balance of payments may be corrected to the earliest. It is the role of the respective government towards restricting in the free play of the inflow along with outflow of capital along with the exchange rate of currencies.

When there is intervention of the respective government both directly and indirectly in that situation international payments that is being undertaken in by the authority of purchase and sale of the foreign currencies could be said to be foreign exchange capital. It could be state that includes in the state regulation that excludes in the free play of the economic forces of the Foreign Exchange Market. It is the responsibility of the respective government towards dealing in the consideration that is being included in the national based needs or requirements.

The Foreign Exchange Control could be said to be monopoly of the government that focused towards purchase and sale of the foreign currencies. It is being used towards restoring in the balance of payments equilibrium along with being disregard towards the forces representing in the market. The market forces could be decisive towards decision making of the monetary based authority.

When the quotes along with tariffs are not towards proper and corrective in nature in that case there raises adverse balance of payments along with balance of trade that could be noticed during payments of the Foreign Exchange Control that is to be restored in by the respective government.

4.1.1 Objectives of Foreign Exchange Policy

The different objectives related to the foreign exchange market include.

The main objective of foreign exchange market is to restore in the balance of payments that is to be equilibrium. There has to be allowing of imports in the case when it is required for the interest of the country along with limiting in demands related to foreign exchange that is up to the limited set of resources. In case export is more country devalues its currencies.

It is also important to protect in the trade and industries from the foreign competition, there has to be restoration towards exchange control. It does help towards domestic industries towards development along with producing and export with the perspective towards restricting in import of goods.

When rate of exchange is not in the proper level in that case purpose of the government lies towards maintaining in the funds for that It may be called to be exchange equalizer. When the rate of the particular currency goes up in that case government starts towards selling in currency in open market then rate of currency falls because of increase in supply.

The government can also go for undervaluing its currency based on the forces of economies. When the domestic capital starts to go out of the country in that case government checks its exports by application of exchange control.

There can be policy of differentiation that could be adopted in by the concerned government. The government can go in for releasing in for required foreign currency for certain countries and can also restrict in trade import and export along with other countries.

4.2 Dealing in foreign exchange

It is the market that determines in the value that could be said to be exchange rate. It is generally for majority of the currencies. It could be said to be exchange of one currency for another at banks. There is also involvement of foreign currency towards the foreign exchange

market. The concept related to foreign exchange had been the market for the government, large companies and hedge based funds.

The foreign exchange market could not said to be one stop market instead is the whole variety of different avenues to explore. The investor can go in from the dealer to dealer and different financial centres to host in the different perspectives of electronic networks.

There are quite number of investment companies that offer in the chance to individuals towards opening of accounts along with trade currencies and it is the investor to decide in this case. In the case of forex market it is basically buying and selling of currency.

In the world economic market the traders do usually take up the position in the specific currency with the hope that there could be upward movement and nature of currency could be noticed thereafter. The strength and weakness of currency could be noticed in this perspective.

There are certain perspectives that needs to be capitalised upon in the market that includes in selecting of the correct pair, there has to be proper analyze of the market, reading quote of the market if necessary, picking in position of the share as necessary, entering towards buying position of the share, entering towards selling position, getting started along with the forex.com.

4.2.1 Advantages of Foreign Exchange Market

The concept referred to foreign exchange could be said to be trading of foreign market. They could be inclusion of foreign currencies along with multiple currencies, financial institutions, individual investors who hedge towards hike fall towards the value related to currency.

There is the globalised market place that could be said to be having no geographical or any kind of localised constraints in the foreign exchange market. Investors can actually go in to the free to trade in the currency-based pairs. There is the constant buying along with selling of the different currencies from the different markets that results towards the coming up of different market locations at the market.

Foreign exchange market operates in the round the clock manner and there is no time constraint as to that perspectives. There is the complete liberty to trade in the market without

any restrictions as to any amount or any form of trade in the market. The foreign exchange market in the country makes it quite popular for those who have a day job and are also engaged in the currency of trade market.

The foreign exchange market does span across the different countries and continents for that reason that also includes in geographies along with different time zone There can be said to be no central authority or any kind of back to articulate the different matters in the effective manner. This has made the foreign exchange market to be more and more transparent along with being flexible at the same time.

There is the multiplicity of trade options that could be noticed in the market up front. It is as per the risk aversion level. The volume of the transactions at the trading market tends to be higher and higher. In that case that leads towards more of liquidity in the required market. Traders can enter into the market likewise get towards leaving the same in the few minutes of time.

The stocks and commodities present in the market could be said to be including in certain amount related to commission fee which seems to be present in the market. It seems to be varying as per the requirements which are an important factor to endorse for. Transactions cost can be said to be low in the market leading towards functions that could be said to be different in the trade market as well.

7.1 Water and Environment Pollution law

Water pollution could be defined as the presence of ground water in the form of toxic chemicals along with biological agents that may said to exceed. It is being found to be naturally found in water and may pose a threat to human health towards environment. It may consist of chemicals that have to be introduced into respective water bodies as a result of different human based activities. Any amount of chemicals that pollutes in water regardless of harm they may pose harm to human health along with environment.

It is to be mentioned that any kind of water can get polluted regardless of location along with size. It includes in remote areas or huge water bodies and is die to air transportation of different pollutant particles and transfer into precipitation water. There can be surface water or ground level water that is being consisted of swimming pools, lakes, ponds along with rivers, seas along with oceans it may become in pollutant in the main course of time.

There can be quick diffusion along with dissipation of contamination along with faster natural degradation process that could be found in respective water body and is said to be shorter the time that is being required for cleansing pollution along with recovery. There are various types of water pollution that could be noticed based on various causes related to water pollution classification can be based on the different types of water pollutants that is being based on classification criteria, water pollution along with chemical when various chemicals are being caused in by water pollution Following can be said to be common water based pollutants in the form of Crude oil along with various products in form of petroleum these can be said to be lighter than water and thus could be said to be forming in top of water that form in sheen of free product, However, there can be parts of compounds that could be dissolved in water even in small amounts and can be said to be harmful and at any time to be remaining in unnoticeable by eye.

There can be fertilizers in small amount that could be said to be useful to life along with higher amounts of nitrates and phosphates in water that could be said to be beneficial to algae along with other related microorganisms. They are said to be poisonous towards human life and aquatic life. These forms of contaminants could be found in water and are said to be typical effects of water pollution by application of fertilizers in the process. It is said to be abundant and fast growing along with respect to water in the process.

Per chlorate could be said to be salt that is being used in rocket fuels along with many other applications in the form of fireworks, road flares, inflation bags along with explosives at the same time. It is being used in military bases, construction sites to be certain. There can be natural formation in areas that could be said to be may account in along with percolate water. The metals along with their compounds could be said to be of higher health risk and are said to be organic metal-based compounds that could be noticed in water and related matters. It does affect in human life along with aquatic life in the significant manner.

There can be different sources with respect to water pollution in the form of disposal of chemical-based substances that could be coming in from the medical, insurance along with household waste, agricultural fertilizer along with accidental spills that could be said to be polluting in water to large extent.

The different examples related to water pollution includes in the numerous agents that could be said to be causing in infections along with contamination of water through the sewage of human waste and animal excreta.

There has to be radioactive waste that could be containing in highly toxic materials in the form of uranium along with thorium and radon. The waster could be said to be major air pollutant that could be resulted in from the mining related activities and power plants and also includes in natural resources.

There can be chemical substances that could be said to be contamination towards water and related products. These chemicals could be in the nature of wither being organic, detergents, plastic along with oil. They could be said to be coming in from agricultural waste, inorganic acids, metals, salts, domestic along with industrial based affluent.

There are certain elements that could be said to be making an impact towards eco system is in the nature of plant nutrients that includes in phosphates and nitrates that could be from various chemicals in the form of nitrates that could be made in from various chemical fertilizers, manure along with sewage.

There could be oxygen that could be said to be demanding manures along with agricultural run of. There can be sediments that could be noticed in soils along with following in soil-

based erosion and heated waters that could be used in several industries along with power plants.

There can be wide variety of diseases that could be caused in by water pollution in the form of serious problems towards human health and living. This can be mainly being caused in by various ways in the form of drinking in polluted water, bathing or taking in shower in polluted water, swimming, consumption of polluted food, breathing in vapours, consuming in heat.

Discuss Water and Environment Pollution law.

7.2 Various Board and their Functions and Powers

The various kinds of boards that had been authorised in order to provide in support and protecting in rights related to water related bodies along with their different functions is being controlled in by the application of the Central Government, State Government along with providing in directions for the same. They have authorised in by the respective government to look into matters that requires in urgent attention in this accord. They are responsible towards protecting in different perspectives related to water related functions along with their bodies at the same time.

They are being asked to focus on facts that requires in urgent attention on their part towards developing in various measures that could be undertaken with respect to the different sets of bodies in this regard.

- **The powers and function of the respective board includes in**

The Central Government had been authorised towards promoting in cleanliness of different streams and also includes in well of different states.

In relation to the foregoing functions they had been entrusted with the role towards performing in any of the respective functions in the form of.

There has to be advising to the Central Government towards taking into account matters of concern that includes in prevention along with control of water pollution. There has to be coordination and cooperation of the relevant set of activities that needs to be taken into account.

There has to be providing of technical based assistance that is to be forwarded to the respective state government those are to carry out sponsor investigation along with research that is being related along with problems related to water pollution and prevention, control along with abatement of water related problem.

There has to be planning along with organizing and training that is to be entertained to persons engaged in programmes for the purpose of prevention, control along with abatement of water pollution i terms and conditions that may be specified in by the Central Government in force.

They are to organize in the mass media long with developmental programmes that could be required in case of water-based pollution. They are to perform in functions that could be eventful for the state government as may be specified in by the order and made in subsection in this accord.

There has to be such functions that are to be undertaken by the respective departments as may be specified in by the respective government for the purposed. There has to be performing of

such functions as could be said to be undertaken by the respective government for the purpose.

There has to be collection, compile along with publishing of technical along with statistical data that could be said to be eventful and measures are being devised in order to develop in effective functioning along with control measures that includes in codes along with guides that could be related to treatment along with disposal of sewage along with trade related affluent that could be used in order to disseminate information that is being present for the purpose.

There can be lay down along with annul, modification that has to be undertaken along with consultation of the State Government and is being concerned along with standards related to stream as well.

There has to be providing of different standards that has to be laid down for the same stream as well for different streams or wells, having regard to the different quality of water along with flow of characteristics of the stream that could be using in nature along with use of the water in such stream as well as streams or wells in this perspective.

There has to be performing of different functions as may be prescribed in for the same. It is the role of the respective Board towards establishing in laboratories that could be enable towards performing in functions under this section effectively. It includes in analysis of the samples of water from any stream as well as other samples of any sewage or trade related effluents.

There has to be development of comprehensive plan that needs to be developed along with prevention, control, along with abatement of pollution related to streams and wells that is to be required in by the state and to secure in execution thereof. It is the role of the state government towards understanding any matters related to concern along with prevention, collection, disseminate information related to water pollution and prevention control along with abatement thereof.

There has to be encouragement, conduct along with participation of investigations along with research relating to problems related to water pollution and also includes in prevention,

control along with abatement of water pollution. There has to be collaboration along with the Central Board towards organizing training of persons engaged or being engaged in programmes that relates to control along with abatement of water related pollution and to organize in mass education programme and any programmes thereto.

There has to be inspection sewage along with trade based effluents that is to be undertaken works along with plants for the treatment of sewage along with trade effluents and to review in plans, specifications and also includes in other data that is being related to plants that had been set up for the treatment related to water along with water based purification of the system for the disposal of usage or trade based effluents or in connection in order to grant in any consent as required in by the respective act in force.
