		Expected outcome	<p>PSO 1: Understand the theoretical concepts of physical and chemical properties of materials and the role of mathematics in dealing with them in a quantitative way. PSO 2: Analyze the concepts of mathematics, physics and chemistry and understand the relation among them like physical chemistry, mathematical modelling of physics and chemistry problems. PSO 3: Skills needed to handle instruments and adopt lab procedures to study physical and chemical properties of materials. PSO 4: Mathematical and Numerical techniques required to compute the research results. PSO 5: Ability to interlink the skills and knowledge in Mathematics, Physics and Chemistry and develop an aptitude to address the problems in Biophysics, Stock market analysis etc.</p>

Outline of the Syllabus	The Master of Arts in English program delves into advanced literary studies, critical theory, and linguistics. Core courses cover periods of English literature, major authors, and critical approaches, while electives may explore contemporary literature, postcolonial studies and creative writing. The curriculum often includes seminars, research methods fostering analytical, writing, and research skills. Learners engage with diverse texts, enhancing their understanding of literary history, cultural contexts, and theoretical frameworks. The program prepares Learners for careers in academia, writing, editing, publishing, and related fields, or for further doctoral studies. Outline of the Syllabus	The Master of Computer Science program empowers learners with advanced knowledge and skills in computer science, software engineering, and emerging technologies. They demonstrate expertise in algorithm design, software development, and system analysis. They possess strong problem-solving abilities and proficiency in programming languages and tools. Equipped with a deep understanding of concepts and applications, learners are prepared for leadership roles in industry, academia, research, and innovation, driving advancements in computing and technology. Outline of the Syllabus	The B.Sc. Programme (Physics, Chemistry and Mathematics) equips students with a deep understanding of fundamental principles in physics, chemistry, and mathematics. Graduates demonstrate proficiency in quantitative analysis, problem-solving, and critical thinking. This programme also enabling the learners to conduct experiments, analyze data, and draw conclusions. Through coursework, students cultivate analytical reasoning and scientific inquiry. Upon completion, graduates are prepared for diverse career paths in research, academia, technology, and industry. They possess a solid foundation for advanced studies in various scientific disciplines, contributing to innovation and advancement in the fields of science and technology. Outline of the Syllabus	BSc programme (Combination of Chemistry, Botany and Zoology) aims to develop scientific temper, observational skills and analytical ability in students. The programme leads the students to higher learning in biological, chemical and applied sciences and contributes to the welfare of the society. B.Sc. Programme provides opportunities to learners to learn all basic concepts in biological and chemical sciences which are very much the need of the hour. The human resource having good knowledge of basic sciences which forms the basis of applied sciences and soft skills as per industry requirement is not sufficient. The B.Sc programme enables the students to enhance their critical thinking, during the three year period of study and the curriculum stimulates the mental thoughts and assumptions of the students. Learning Management System (LMS)

Counselling Process

Mode of Counselling :- Online

Brief describe the provision in LMS to be used by HEI :-

Our in-house developed Learning Management System (LMS) is user-friendly and complies with UGC Regulation 2020. It allows faculty to create and manage courses, assignments, and assessments effortlessly. The LMS supports interactive tools like quizzes, forums, and video conferencing, promoting student engagement. It offers detailed tracking and analytics to monitor student progress and performance. Integrated communication tools facilitate seamless interaction between students and faculty. The system ensures data security and privacy, providing a safe learning environment. Overall, our LMS supports HEIs in delivering an effective and engaging educational experience.

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :- <https://lms.jnujaipur.ac.in/>

Assessment mechanism	We conduct assessment using online proctored examination mode. The platform that we use allows faculty to create and manage quizzes and tests. These assessments can be scheduled for specific time slots and can include multiple-choice, short answer, or essay questions. Students can submit assignments online through the LMS, where instructors can grade and provide feedback directly, streamlining the assessment process. Discussion forums on the LMS enable students to participate in both synchronous and asynchronous discussions. Additionally, the LMS supports proctored online exams, incorporating extra security measures to ensure integrity.
Identified technological interface and interoperability	The system is designed to work seamlessly with educational content, interactive programming exercises, originality verification, and virtual meeting capabilities. Additionally, it allows for the incorporation of new platforms and technological solutions through APIs, following a comprehensive evaluation process.
Learner's Authentication Requirements	To access the Learning Management System (LMS), individuals are required to create a distinct username and establish a robust password. Upon registration or password modification, a verification process is initiated where a link is dispatched to the user's email for confirmation.
Learner Registration - through a web application	The web application has a registration form designed to collect the information like Name, Contact number, Address, email, educational qualification, ID details etc.. from learners. They have the option to select the desired program. A verification step is incorporated into the registration procedure to safeguard against unauthorized access. Additionally, learners are required to input payment details to finalize their registration. Once registered successfully, learners have the opportunity to build a user profile for further personalization. A confirmation email is dispatched to the learner's email address, extending a warm welcome to the program and further steps for enrolment.
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	The platform can host interactive content, including quizzes, polls, and discussions, to engage learners effectively. Analytics track participation and performance in these activities, offering insights into the most effective methods. Incorporating gamification elements, such as badges, leaderboards, and discussion forums, further motivates learners. By measuring participation levels, the quality of discussions, and identifying learners who may need additional support, analytics play a crucial role. Tracking video views, completion rates, and interactions within learning material helps faculty understand learner engagement.
Payment Gateway –using Digital Payment system	Available
Tracking the delivery of a Course or programme	The system maintains a record of student enrollments and their interactions with the Learning Management System (LMS). It observes and records the frequency and duration of user logins, as well as the regularity of their visits. Additionally, the LMS keeps track of the course content and resources accessed by students, along with their level of engagement. It archives all quizzes, assignments, and exam data, evaluates performance scores and the rate of course completion, and logs all communication between instructors and students, such as messages and forum contributions. The platform also oversees the assignment and assessment grading process, ensuring that feedback is provided to students promptly.
Technical Know-how or Skills Requirements	The LMS is designed to be user-friendly that can be accessed by beginners. Clear indications are provided to users for next steps for the registration process, accessing learning material, and navigating to assessments. Users are guided to use discussion forums, chatbots, and messaging features on the LMS. Faculty members are trained and have the ability to create quizzes, assignments, and exams. Faculty members also host virtual meetings, webinars, and collaborative projects, as well as possess skills to generate and interpret reports on learner progress and engagement, and have an awareness of data security.

Briefly write on ICT facilities available/ to be ready dedicated for the implementation of Online Courses :-

Provided with bandwidth of 1 Gbps Broadband Line from National Knowledge Network (NKN), the Institute has been connected round the clock Internet facility with high-speed Optical Fiber and Wi-Fi. The network is protected and controlled by Unified Threat Management (UTM) XG next generation firewall. The computer facility has been provided to each School/Department with peripherals and are connected through LAN/Wi-Fi. LCD projectors interfaced with computers have been installed in the Lecture Halls/Class Rooms to undertake Computer-Aided Teaching/Learning as well as for presentations. All the campuses of Jaipur National University are under round the clock CCTV Surveillance System for safety and security. The library and information services activities have been made fully automated. The Institution deploys and upgrades the IT infrastructure and associated facilities whenever required. IT Department is very responsive to comply with any requirements/repairs received from Heads of Departments for implementation. Computers and other hardware are regularly upgraded with modern configuration to upkeep with the necessary academic requirements. Routine maintenance of computers, peripherals, network devices, servers, etc. is carried out by the staff members of the department of IT.
